## EDUCATION

Aug. 2017 – Present

### Bachelor of Science at Purdue University

- Software Engineering and Cybersecurity
- **3.85 GPA**
- 6x Dean's List                      5x Semester Honors

## EMPLOYMENT

May 2020 – Present

### Qualcomm, QGOV Division

*Embedded Software Engineering Intern*

- TBD

May 2019 – Aug. 2019

### Naval Surface Warfare Center, Crane Division

*Software Engineering Intern*

- Improved US Navy missile sustainment efforts by upgrading an existing natural language processing algorithm to process failure databases.
- Held a valid 'secret' level security clearance given by the US Government.

## EXPERTISE

### Languages

C              C++              Python              ARM/x86 Assembly              Bash              Javascript

### Memory Management

- Paging, Virtualization
- Cache Memory Hierarchy
- Stack and Heap Management for ARM/x86

### OS and Systems Programming

- Software/Hardware Interrupts and Device Management
- Asynchronous Inter-Process Communication
- Return-Oriented Programming
- Concurrency and Parallelism (Semaphores, Locks, Forking, Threading, Scheduling)

### OSI/ISO 7-Layer Model

- TCP, UDP, HTTP
- IP addressing/routing, DHCP, DNS translation
- MAC addressing/routing, ARP
- Basic cryptography and security approaches

## PROJECTS

April 2020

### Web Server Honeypot (Extracurricular)

- Hosted an HTTPS Honeypot Server to lure attackers and collect information
- Graphical directory browsing and support for 14 HTTP response codes
- Automatic blacklisting for clients who send too many requests too quickly
- Analyzed logs and learned about different types of attacks on web servers

March 2020

### Process Hijacking in XINU (Operating Systems)

- Manipulated a victim process by locating and modifying return addresses and local variables in the runtime stack
- Learned about protection against this sort of attack (i.e. stack canaries)
- Studied how x86 interrupts, system calls, and function calls affect the runtime stack

Sept. 2019 – Oct. 2019

### Shell Interpreter in C (Systems Programming)

- Parsing and execution of commands
- File redirection and piping
- Signal handling and inter-process communication
- Subshell execution via forking
