EDUCATION

Aug. 2017 – Present

Bachelor of Science (Software Engineering and Cybersecurity)

Purdue University
- 3.83 GPA
- 6x Dean's List, 5x Semester Honors

EMPLOYMENT

May 2020 – Present

Qualcomm, QGOV Division

Embedded Software Engineering Intern
- TBD

May 2019 – Aug. 2019

Naval Surface Warface Center, Crane Division

Software Engineering Intern
- Improved US Navy missile sustainment efforts by upgrading an existing natural language processing algorithm to process failure databases.
- Held a valid 'secret' level security clearance given by the US Government.

EXPERTISE

Languages	C	C++	Python	ARM/x86 Assembly	Bash	Javascript

Memory Management
- Paging, Virtualization
- Cache Memory Hierarchy
- Stack and Heap Management for ARM/x86

OS and Systems Programming
- Software/Hardware Interrupts and Device Management
- Asynchronous Inter-Process Communication
- Return-Oriented Programming
- Concurrency and Parallelism (Semaphores, Locks, Forking, Threading, Scheduling)

OSI/ISO 7-Layer Model
- TCP, UDP, HTTP
- IP addressing/routing, DHCP, DNS translation
- MAC addressing/routing, ARP
- Basic cryptography and security approaches

PROJECTS

April 2020

Web Server Honeypot (Extracurricular)

- Hosted an HTTPS Honeypot Server to lure attackers and collect information
- Graphical directory browsing and support for 14 HTTP response codes
- Automatic blacklisting for clients who send too many requests too quickly
- Analyzed logs and learned about different types of attacks on web servers

March 2020

Process Hijacking in XINU (Operating Systems)

- Manipulated a victim process by locating and modifying return addresses and local variables in the runtime stack
- Learned about protection against this sort of attack (i.e. stack canaries)
- Studied how x86 interrupts, system calls, and function calls affect the runtime stack

Sept. 2019 – Oct. 2019

Shell Interpreter in C (Systems Programming)

- Parsing and execution of commands
- File redirection and piping
- Signal handling and inter-process communication
- Subshell execution via forking
